To whom it may concern

I write to offer my comments in relation to the Business 'Our Cow Molly'

I have worked closely with Ed and the team for a number of years now and I must say I can't speak highly enough of the entire operation and business ethics.

Indeed when I launched the Banks's Young Farmers Proposition at the House of Commons recently I chose Our Cow Molly as the business I wished to showcase and use as a case study ie 'A role model business' given the overall business acumen of the team and performance of the business. Just to put this into prospective we have a 29% market share of the UK Agricultural PLC and I chose Our Cow Molly above every other business we look after.

We have also worked together on the highly successful 'Open Farm Sunday' programme and when I visited the farm on Open Farm Sunday I found a well run and well organised farm with hundreds and hundreds of visitors. Ed made the event successful and a joy for all the local families and children attending his farm.

So all in all I fully support the planning application in progress and would be willing to speak further should you need to ask any further questions on the business - I would of course need to ask permission of Ed 1st though

Kind regards

Ian
